I made a couple of minor changes to the SOWs to make sure that QA is clearly addressed for our QA group. I'll be sending shortly.

Subject: FW: SOW draft for Upper Animas

Ok, Kate said that all I need to put in the IA I am doing is the generic IA Draft SOW she gave you above tweaked to be Region 8 specific with Omaha. Then the other two more specific SOWs get attached to the WAF 1 and WAF 2. I then incrementally fund the WAFs as money is available. SO I need the a-k breakout for labor and indirect for the procurement assistance and then I identify the breakout of the money on the WAFs. I will also verify with Marvene that this is what they need.

Paula,

Wrote this up really quick for you. I have attached two things:

1. A draft SOW
2. My tech assistance IA SOW for your reference

Let me know if you have any questions.

Kate
